ALL CUT UP OVER IT. British Still Annoyed by Successful American Competition.

Awarding of the Athlone Bridge Contract to Philadelphia Firm Causes Deep Concern in British Industrial World.

America's successful competition in the industrial market, where she is beating the Britishers on their own ground is undoubtedly causing deep concern and heartburnings in British engineering circles. The acrimonious protests of English firms respecting the awarding of the Athlone bridge contract to a Philadelphia firm brought out clearly this feeling and the attempts to explain America's success by glut of work in England do not harmonize with the complaints from English firms who have not received orders which have been sent to America. As the London St. James Gazette puts it:

"If the British manufacturers have so much work that they cannot accept contracts they are to be congratulated. But, in that case, it is difficult to see why they are complaining."

The fact is that industrial circles in England recognize that these contracts mean more than mere evanescent competition, as, in the case of American engineers, the railroad authorities in England have conceded the very highest opinion of American work. This is borne out by the statement of Manager Snel, of the locomotive department of the Great Northern Railway, which recently ordered engines from America. He said:

"Apart from the fact that American builders are able to make more speedy delivery than the English, there is no doubt whatever that American engines are of the highest excellence and that their present features and improvements are of such utility as to attract the custom of English companies."

The Daily Mail, taking up the question, urges a system of profit sharing, with the introduction of the newest and best machinery, as the method "whereby America can be fought and worsted," though the paper adds:

"We must own that the nation is in some degree suffering from lack of strenuousness both in employers and employed."

The secretary of the engineers' society said:

"We certainly regret the transference of work essentially belonging to our market and it would be affectation to deny there is indignation and much comment on the state of affairs. We hope it will prove only temporary transference; but, you know the danger."

DOGS BARRED FROM ENGLAND.

Regulations Tourists and Others Must Conform to—Effort to Prevent Spread of Rabies.

People who are contemplating a trip abroad this summer, and who wish to travel with dogs, will be interested to know that the importation of dogs into Great Britain without a license is forbidden. Application for license must be made to the secretary of the board of agriculture, 4 Whitehall place, London, S. W. In time to permit the board to inquire into the circumstances of the application, etc., before the embarkation of the dog takes place. Dogs will be detained for six months under supervision of the authorities, on some suitable private premises specified by the owners. If the conditions imposed are properly carried out the board will consider applications, accompanied by the certificates of veterinary surgeons, that the dogs are not suspected of rabies, for their release after 90 days. Dogs whose antecedents are unknown will be subjected to a longer period of detention.

In exceptional cases, the board will entertain applications made by telegram, on condition that a full description of the dog be given and the place in which he is to be detained specified. For the convenience of persons passing through Great Britain, the board in special cases will authorize the landing of dogs which are to be exported in a few days. In making applications for such license the ports, names of the vessels, and dates of arrival and departure must be specified, and the address of some suitable place where the dog can be detained during the period it remains in Great Britain, which must not exceed ten days.

NAMES FOR WARSHIPS.

Twelve New Fighters Given Their Cognomens by the Secretary of the Navy.

Secretary Long has named the 12 ships which were authorized by the last congress, and which will soon be added to the navy. The three battleships are named the Pennsylvania, New Jersey and Georgia; the armored cruisers, West Virginia, California and Nebraska; and the six protected cruisers, Denver, Des Moines, Chaffin, Chicago, Galveston, Tacoma and Cleveland. Heretofore only two battleships were given the names of states, but now all ships of the first-class are named after the states. The armored cruisers are first-class ships in every respect and when launched will be able to give good accounts of themselves in a contest with a battleship, as they are as heavy as the ordinary ship of that class.

Capacity, One Hundred Thousand. The Crystal Palace in London, where the first world's convention of Christians Endeavor will be held in 1900, can accommodate 100,000 persons. Preparations are making for 25,000 delegates.

TREED BY A PACK OF WOLVES.

South Dakota Farmer Has a Thrilling Adventure in the Early Morning.

James Adams, who lives near the Missouri river in Clay county, S. D., has had an exciting adventure with gray wolves. Until quite recently these fierce animals have been content to remain west of the river, where settlement is more sparse, but many of them have now found their way to the east side of the stream, where they prey principally upon chickens and sheep. Adams has traps set for the animals, and has caught a number this winter. Before sunrise a few mornings ago he made the customary rounds of his traps, and in one of them he found a huge gray wolf. Not being armed, he hesitated about for a club with which to slay the animal. While thus engaged, the entrapped wolf set up a peculiar wailing howl, and before Adams realized his peril he was surrounded by 13 gray wolves, whose snapping jaws and evident intention to spring upon him and tear him to fragments caused the trapper's hair assumed a perpendicular position.

He, however, put on a bold front, and by steadily eyeing the fierce and famishing brutes kept them at bay while he moved slowly and cautiously toward the nearest tree, which he speedily climbed. The wolves, apparently realizing that their expected prey had escaped them, ran frantically around the base of the tree in which the fugitive was imprisoned, meanwhile howling and exhibiting their teeth in their impotent fury. The air was frosty and the frigid wind chilled Adams to the marrow, but not until the sun had risen some distance above the horizon did the animals leave the tree and skulk away to the shadows of the surrounding willows. When he believed it was safe to do so Adams descended the tree in a badly chilled condition. After going home and warming himself he took his Winchester rifle and repaired to the scene of his adventure, where he soon dispatched the entrapped wolf. No more of the animals were to be seen.

THE ADMIRAL DEWEY ROSE.

A New Flower Which Is Said to Be Popular—The Beautiful Liberty Rose.

Of the many things named for Admiral Dewey since the victory at Manila it is probable that none is more worthy of the distinction than the new rose which has lately appeared. It is of a light tea shade and is very fragrant. Its principal characteristic, and the one which has enhanced its value in the eyes of florists, is its lasting quality. An Admiral Dewey rose will retain its freshness for as long as ten days. The rose has been in the market for a little over three months, but the supply is yet very scarce. It is grown by a florist at Bayside, L. I., who is said, paid \$15,000 for the original plant. The rose in some respects closely resembles the bridemaid rose, although of a much richer color.

Another new rose on the market is the Liberty. It is an importation from England, \$35,000 being paid for six plants by a florist, who saw a chance for speculation. Although no Liberty roses will be sold till next year, those already exhibited have won the admiration of florists, many of whom are of the opinion that it is the finest rose on the American market. Its claim for such distinction is in its color, which is a genuine ruby red. Every rose being almost an exact match in color of the finest gem. No other rose approaches it in this respect, it is said. In size the Liberty rose compares with the bridemaid and has a heavy thick stem. One of the largest florists on Broadway recently exhibited a few Liberty roses in his window, in another part of which were some of the famous Lawson pinks. The exhibition drew an enormous crowd, but the roses apparently came in for a greater share of admiration. It will be some time, it is said, before many can be purchased, as only 500 roses will be propagated next season.

The two roses, the Admiral Dewey and the Liberty, florists say, are the finest yet produced in this country.

A Sure Sign.

"Well, yes," remarked the Kokaek philosopher, removing the stem of his beloved pipe from his mouth; "I guess you are right. I agree with you in a measure, anyway. I cankerate, myself, that to meet a hearse is a sure sign of death. I have never known of anybody hauling a live man around in a hearse."

A Gentle Hint.

"I should like to kick him," said the enterprising young physician as the leading citizen passed by.

"For why?" asked the officer loafer.

"When he had the gripe I told him I would like to have a try at him, or words to that effect."

"And he refused."

"Worse than that. He said he would not mind, as far as he was concerned, but he hated to see a rising young man like myself incur the ill-will of his widow."
